

# DELIVERY PRICE SCHEDULE FOR NETWORK WAITAKI

Effective from 1 April 2024

The prices in this schedule are used to charge electricity retailers for the delivery of electricity in the Waitaki region serviced by Network Waitaki. Electricity retailers determine how to allocate this cost together with energy, metering and other retail costs when setting the retail prices that appear on an end consumer's power account.

Note: All prices are exclusive of GST.

## NOTES:

1. All Charges are GST exclusive. GST is payable in addition to the charges.

2. The price movement amounts to an average overall 11.0% increase mainly as a result of increased operational and capital expenditure. This increase will allow Network Waitaki to upgrade our network to meet the current and future supply demands of our customers.

Our planned system growth projects and focussed renewals programme will future proof the network to support the increasing electrification of transport and industrial processes and as more homes and businesses electrify their vehicles and heating as part of decarbonising our region.

More information on how prices are determined is published in our pricing methodology which is available on the Network Waitaki website ([www.networkwaitaki.co.nz](http://www.networkwaitaki.co.nz)).

3. Eligibility for the "Residential Low Fixed Charge" price category requires that the premises must be the consumer's principal place of residence as defined by the Electricity Industry Act 2010.

4. Volume (kWh) prices are based on volumes metered at the Grid Exit Points supplying the network. All metered loads should be grossed up using the appropriate loss factor to arrive at the chargeable GXP volume.

Different rates are applied for "day volume" (07:00am until 11:00pm) and for "night volume" (11:00pm until 07:00am the next morning).

5. Large Commercial (LC) load group with connections higher than 750kVA: Daily capacity prices are based on contracted capacity. Daily demand prices are applied to an assessed demand level that is available on request.

Capacity and demand prices accrue on a daily basis at the rate of 1/365th of the annual amount due, or 1/366th during a financial year that includes a leap day.

6. Distribution and Pass-through prices are charged in respect of each site and electricity retailers are invoiced monthly in arrears. Fixed prices accrue on a daily basis at the rate of 1/365th of the annual amount due, or 1/366th during a financial year that includes a leap day.

7. Pass-through prices consist of transmission prices, rates and regulatory levies.

8. Where an ICP is disconnected for seasonality reasons and reconnected in the same 12 month period, Network Waitaki reserves the right to charge the fixed charges that would have been due over the period of disconnection had the consumer not seasonally disconnected.

9. Network Waitaki pays an annual discount to consumers. Discounts will be payable based on the number of days the installation has been connected within a specific load group. The discount methodology is available on the Network Waitaki website.
